# CONNECTING EVERY STEP OF YOUR PROCESS ••

# CONNECT your WHOLE ENTERPRISE

your COMPLETE INVENTORY SOLUTION

- Customer Service: Improve the response times of your shipments through picking intelligently, eliminating order checking and routing product.
- Inventory Management: Track the location of items in stock or in transit for shipping (crossdocking). Replenish SKU's according to pre-set minimums and maximums.
- Administrative Consoles: Control most DC functions from a desktop computer or mobile tablet. Track employee performance, set benchmarks and manage wave picking.
- Automatic Data Capture: Reduce costs through process optimization and real time inventory management with instant data visibility.
- Inventory Accuracy: Increase inventory accuracy by checking and confirming inventory put-away and order picking.
   Use defined policies to automate and manage inventory moves.
- Virtual Distribution Center (VDC):
   Realize real-time visibility of accurate inventory data throughout your enterprise.
